GERANIUMS

We have no hesitation in claiming that we offer the best assortment of Geraniums in the country, and yet it contains only distinct and useful varieties, such as can be depended on to produce satisfactory results.

Easter coming next year on April 20th will make it a Geranium Easter, as under normal weather conditions it will be late for bulbous stock. People will want spring flowering plants, particular for cemetery decoration.

There was no surplus of Geraniums left over this spring so that we can look for a shortage again next spring. Easter will call for large plants in 5 and 6-inch pots. We suggest early ordering as we were advised about coal, a short time ago. Get it on hand.

We have excellent stock on hand for immediate shipment and are booking orders for future delivery.
